TRAINING TOGETHER

Highfield Level 3 International Award in Emergency Paediatric First Aid and Use of an AED

WHY CHOOSE BOC?

You will be trained by experienced instructors and trainers who are qualified Nurses and professionals who use their First Aid on a regular basis. They are also highly experienced and proficient First Aid trainers

You will not only receive training; you will receive the best interactive practical training available in a classroom setting with individual attention being given

Instructors use role-plays with different scenarios during the training and we strive to copy reality as close as possible.

This course will equip learners with the skills and certainty to move assertively and become a vigilant parent or nanny in identifying a child or toddler in distress and how to do effective CPR, operate an Automated External Defibrillator (AED) during cardiac arrest, and how to deal with a choking child.

The course is explicitly designed for newborns and children up to 5 years of age.

CERTIFICATION

- ⦿ 3 Year certification validity
- ⦿ Dubai Corporation for Ambulance Services (DCAS) accredited
- ⦿ In line with the latest resuscitation guidelines

28B St. Al Twar 2, Dubai
